"The Review" asks Shall We Not Soon Have To Hoist The Stars and Stripes?

Americanization or Canadianization?

"IT IS DESIRABLE THAT MEASURES SHOULD BE TAKEN TO ENCOURAGE THE PUBLICATION OF CANADIAN MAGAZINES AND PERIODICALS" So ran a resolution proposed in the house last Monday by Mr. A.C. Hocken, Conservative for West Toronto. To that resolution we think all the people will heartily agree. But as to how this may be done there is room for disagreement. As a protectionist, Mr. Hocken naturally proposes a tariff wall to make the entrance of periodical literature from the United States difficult. As a free trader, Mr. John Evans the stalwart Progressive member for Saskatoon suggests as an amendment that the Tariff be Removed from Paper, Ink, Type and Cuts used in the production of Canadian periodicals so that they may have a better chance of competing with their alien competitors, to whom these things are available for at least Twenty-Five per cent Less

This is Canada

Mr. Evans had strong ground for his amendment. Wood grown in Canada and pulped in Canada by Canadian water powers, is sent to the United States, made into paper by United States mills and sold to United States periodicals at 25% Less than it can be bought for by Canadian periodical publishers even though it is so largely a Canadian product. This is because the Canadian paper-makers are enabled by the Canadian tariff to charge the Canadian publishers 25% More. On this score alone the Canadian publisher must therefore give the Canadian reader 25% less quantity than the United States publisher, who buys that much cheaper. What more reasonable than Mr. Evan's amendment than to place Paper and other materials used in the production of Canadian periodicals on the Free List? No country in the world has greater facilities for papermaking than Canada, and her papermakers are able to compete with those of the United States in the open markets of the world; "why not then in their own country?" It would seem moreover, to be short sighted policy, as well as unpatriotic to cripple their own country's periodicals as these are ever their surest and best market. Not only can the Publisher in the United States buy his material so much more cheaply than, on account of the tariff, the Canadian publisher may do, but in that the former buys in much larger quantities he has a further advantage in price, and in that his overhead cost has all been abundantly covered by his large home circulation and his unlimited advertising he can practically dump his excess circulation into Canada at the Mere Cost of Paper and Postage. No other Canadian enterprise is subject to such Unfair Competition. No other Canadian enterprise is more worthy of Canada's best consideration than one that makes for her unity and develops her best ideals. If something is not promptly done to enable Canadian periodicals to develop national ideals "we might as well consider hoisting the Stars and Stripes on Parliament Hill at once" The Alien periodicals are fast preparing the way for that. So far the motion merely expresses a sentiment, a sentiment that was approved by the house without division. It remains now with the Minister of Finance to deal with it in connection with his budget, and we sincerely hope that in the interval he will see the fairness of removing the heavy handicaps imposed by the Canadian Tariff upon the Canadian periodicals—a tariff which works to the incalculable benefit of alien periodicals

Markets and Requirements
For Export Cattle

Experimental Farms Note

Feeders of beef cattle may look with considerable assurance for a strong market for Properly Selected and Finished export beef on the hoof during the later part of April and the first weeks of May. No very great movement can take place before that time, for the terms of the cattle embargo removal, which become effective April 1st, stipulate that all cattle must be shipped from a Canadian port. Montreal is the logical economical port for these shipments but it will not be open until about the end of April. A few shipments may go by way of Halifax or St. John in the meantime, but, on account of the high cost of rail transportation, the bulk will be held for the opening of the port of Montreal. Present indications point to a heavy demand from the British market as soon as it can be supplied.

The statement "properly selected and finished" used above is used advisedly. The British consumer is a connoisseur of beef and his palate is not likely to be satisfied with any second rate meat, consequently if we do not wish to limit this prospective beef trade into the secondary position in which we now find our bacon trade, let us start right by sending over a well graded product. Grading should be done on the basis of breeding, size, finish and suitability for shipment. In the first place an export steer should show sufficient good beef breeding that he will fill the eye of the prospective buyer on that score alone. First impressions are most lasting. Size is both for and against shipment being on the basis of so much per head, the heavier the animal the lower the cost of transportation. The demand, however, is for a medium sized animal. Selection should therefore be on the basis of weight for size and age, i. e., heavy light animals. The finish must be up to a fairly high standard, recently and uniformly put on. Here to a greater extent than is the case on our home market is where feeding to a high finish will be justifiable. Suitability for export shipment includes such factors as freedom from disease, or recently received blemishes; a degree of docile temperament; and last, but not least, an absence of horns, for dehorning is practically imperative for export shipping. If these few factors are kept in mind at the start and nothing but Canada's best shipped over, a steady rather than a glatted market may be looked for.

Floating To Death On Ice Cake
Sang "Nearer My God To Thee"

OMAHA, Neb., March 14th.— Floating on an ice cake in the Missouri river to certain death with the banks lined with friends and relatives unable to avert the tragedy, two Iowa men chose as their farewell message, the hymn: "Nearer My God To Thee"

For hours Harvey McIntosh, 30, and his brother Tom, 26, of Mondamin, Iowa, had been marooned on a sandbar after a sudden rise of the river had swept away their boat, while they were hunting ducks. Their cries brought many persons to the banks, but all attempts to send aid to them failed owing to a heavy flow of ice

As the crest of the flood came on the water rose to the men's arm pits. "We have caught an ice cake," they shouted shortly after midnight and then out of the darkness of the river came the strains of the hymn that grew fainter and fainter

No trace of the bodies have been found

Ask Dominion Fix Minimum Wheat Price

WINNIPEG, March 14 — A. P. Bolvin, United Farmer member for Iberville, submitted a resolution to the legislature today urging the Dominion Government to guarantee farmers of Canada a fixed minimum price for wheat and other grains, based on the cost of production. Mr. Bolvin suggested the price of wheat should be between \$1.35 and \$1.50 a bushel

The resolution will be debated in the house next week

British Budget To
Show Surplus Over
A Hundred Million
Close Of The Year

Income Tax Returns Exceed
Estimate by Seven and a
Half Million Pounds

BIG SURPLUS COMES
AS A GREAT SURPRISE

LONDON, Mar. 14.—This morning's newspapers predict a record budget surplus at the end of the fiscal year on March 31st.

The statement of the chancellor of the exchequer to March 10th, shows a surplus of £102,000,000 made possible by a large reduction in expenditure and considerable increase in revenue. The income tax has come in so well, that not withstanding the fact that it is now shilling in the pound less than in the previous year, it exceeds the estimate by £7,000,000. Several other revenue items, show large increases

Cost Of Hay And
Relief Last Year

EDMONTON, March 13.—It cost the government of Alberta \$355,451.82 for hay and relief in 1922. Hon. Geo. Hoadley said Tuesday in answer to a question by Geo. Mills, member for Athabasca. Free freight cost \$200,300 of which the Dominion government will bear \$60,000. The cost is charged to last year's hay and relief vote and to capital account

A Wild Twelve Hours
In Bow Island

Wilmot and Henderson's
Fine Big Garage
Burnt To The Ground

Mr. Joseph Halloran
Caught in Machinery At
Elevator and Nearly Killed

A wild twelve hours was experienced in Bow Island from the Friday afternoon to about 5 o'clock Saturday morning

On Friday afternoon Mr. Joseph Halloran was caught by a sprocket wheel in the machinery of the Ogilvie Elevator and was badly jammed. he sustained a broken rib, injured arm and other severe injuries and he no doubt would have been killed outright but for a farmer, who was in the Elevator at the time, jumped in and stopped the machinery.

Wilmot and Henderson's
Garage Burnt
Spectacular Blaze

At 1 a.m. on Saturday morning, people were roused from their beds with loud shouts of Fire! Fire! and the Fire Bell was wildly ringing — it was found that Wilmot and Henderson's fine big Garage was in flames and soon it was a roaring furnace and despite the hard work of the Fire Chief and his assistants and the A. P. P. and many of the Storekeepers, the fire quickly burnt the Garage to the ground. It was a near squeak for the home and also the adjoining Printing Plant of the "Bow Island Review" which was only a few feet away from the fire, but a strong West wind blew the flames Eastward away from the "Review" Office.

Splendid co-operation was given by the C.P.R. officials, as our Station Agent got the C.P.R. pumpman at the river to pump water into the Town Hydrants and but for their splendid response, the whole town might have gone up in flames and the Town's heartiest thanks will be extended to these C.P.R. officials

It sure was some "Wild Night"

"Better Days" Women's Institute Burdett

Held their regular business meeting Wednesday March 7th, 1923 at the home of Mrs. J. Neil. There being a good attendance of 18 ladies present, five of these were new members. Roll call was answered with a short poem. Medsades Neil and Poel entertained with singing "My ain was home" and a Negro Lullaby which was enjoyed by all.

Mrs. R. Collins gave a splendid paper on "Education and better Schools" urging for more co-operation between teachers and parents. Meet-

ing now closed with happy singing of "Add Lang Syne," tea was then served by hostesses Medsades Neil, Hunt, Collins.

The Burdett Women's Institute will hold their next regular business meeting at the home of Mrs. U. C. Brundale Saturday April 4th, 1923 at 2:30 p.m. sharp, hostesses Medsades Brundale, Warty, J. E. Campbell.

Roll call to be answered with a "House Cleaning Hint"

Mrs. Jobb
Publicity Convener

Burdett News From our own Correspondent

The R.S.A.S. entertain the G.W.V.A.

On March 7th, the R. S. A. S. entertained the G. W. V. A. and friends in the Club Room at a white drive, about 30 guests were present.

BORN - To Mr. and Mrs. Dave Burns at the Van Haren Hospital. Lethbridge a daughter, mother and child doing well.

BORN - To Mr. and Mrs. John Collins, on Wednesday March 7th, a daughter, both doing well.

Nurse Hendershott and Dr. McPhail in attendance.

Mr. Wm. Donaldson who has been spending the winter at the coast, has returned home.

Mr. Munroe, of the Department of Neglected and Delinquent children, Edmonton, was in town, investigating the case of the children of a resident. It seems that the children of the village have been in the habit of entering the lobby of the Post Office and endeavouring to open the boxes by working the combinations, the country children being strange to "City ways" were unfortunately enough to be caught, as this is a crime in the eyes of the law, it was brought to case, after the evidence was taken and summed up, it was found that while the children pleaded guilty, they were not alone and the judge gave them suspended sentence for six months, and they were instructed to report to the President of the Women's Institute every Saturday. It is hoped that the rest of the children will take warning and behave themselves in the future as it would go hard with the offenders if there was to be another case.

The Burdett Women's Institute met on the first Wednesday in the month at the home of Mrs. Jas. Neil, about thirty of members were present and a very busy and profitable afternoon was spent, tea was served before departing. Five new members were enrolled.

Buy your Masques at E.M. Johnstons for the Ball on Friday

New Library

A new library has arrived for the Women's Institute, any of the members who wish to take advantage of this reading material, will please leave in mind that the library will have to be returned to Edmonton in two months time, so do not delay.

Lenine Is Stricken

LONDON, Mar. 13.—A Reuters dispatch from Helsinki today says Premier Lenine of Soviet Russia had an apoplectic seizure yesterday. His condition, the message adds, is serious.

A Moscow dispatch on March 7 quotes Leo Kamenoff as stating that Lenine's health was gradually improving after having suffered from overwork following last summer's illness.

Laugh and Grow Fat

Bill had a bill-board; Bill also had a board-bill. The board-bill bore Bill, so he sold the bill-board to pay his board-bill. After Bill sold the bill-board the board-bill no longer bore Bill.

"Aren't you master in your own house?"

"Well my wife and I have divided tasks she looks after the money, the children, the servants, the dog and the cat. I look after the godfish."

Stranger (at Continental palace gates): "This is visitors' day is it?"

Attendant: "Yes, sir, shall I show you round?"

Stranger: "Oh don't trouble, I used to be King here once."

Mrs. Newcomb: "Immediately after marriage a man is different."

Mrs. Longwood: "Yes and a year after marriage he is apt to be indifferent."

Higgs: "My word, Higgs, that's a handsome Umbrella. Where did you get it?"

Biggs (who is very cautious): "I decline to answer that question until I have consulted my lawyer."

Mother: "Dear son, the lady has swallowed a piece of chocolate."

Father: "That's nothing to the farms she'll have to swallow when she grows up."

Visitor: "Does Mr. Crawley, who is a student at the University, live here?"
Landlady: "Well, Mr. Crawley lives here; but I thought that he must be a night watchman by the hours he keeps."

Mrs. Bullion... to the principal of the school attended by her daughter; "Dear Madam,—My daughter informs me that last term she was obliged to study vulgar fractions. Please do not let this happen again. If my child must study fractions, let them be as refined as possible."

Charlotte: "Saw Joe at the pictures with Mabel. Aren't you keeping company with him now?"

Glady: "No I asked him if he liked her better than me, and he said yes—so I threw him over."

Old Lady: "You said you were crippled."

Tripp: "Yes, lady. The profession at bed-war is naturally crippled when he has his sinus cut off."

Youths Intent on Robbery End Night With Murder

VICTORIA, March 13.—As a result of confessions of Ronald Smith, 17 and Herbert Burton 15, the mystery surrounding the murder here February 28th, of Lionel Lorenz, 20 year old bank clerk, appears to have been solved.

The two boys, who attempted to hold up Lorenz, were arrested last week with four others and charged with a series of robberies of local stores.

Three of the boys were released, but the other three, including Smith and Burton, were held and the confession was obtained last night, it was stated, after close questioning.

According to the police, the boys were bent on robbery. They said they started out on bicycles on the night of the crime with the intention of staging a holdup. Lorenz happened to be the first man to meet them after they had mustered courage enough to commit the deed.

Lay Murder Charge Against Two Boys

VICTORIA, Mar. 13.—Charged that they "did unlawfully murder Ernest Lionel Lorenz," on the night of February 28th Ronald Smith, 17, and Herbert Burton, 15, appeared before Magistrate Jay in the juvenile Court at noon and were remanded for the preliminary hearing to be held on Thursday at eleven o'clock.

As Smith and Burton were led in from the cells they exhibited no visible signs of emotion.

ANNUAL FORAGE CROPS (Experimental Farms Note)

A succession of dry years with soil drifting and small grain yields has forced on the minds of Western grain farmers the question of keeping live stock as another source of revenue. For horses, cattle, sheep and hogs we must have forage crops for both pasture winter feed. Free range is a thing of the past, and in many districts wild pastures and wild hay are very rapidly passing; but if the keeping of live stock is to be profitable we must have cheap and abundant forage crops.

A good stand of any of the perennial grasses such as Timothy, Western Rye Grass or Brome Grass, Alfalfa or Sweet Clover, will in normal years produce several times as much forage per acre as wild grass will, but in these dry years it is difficult to secure a good catch of any of these crops. Not only is it hard to get new stands, but old fields have become so dried out that the first cutting is very light and there is almost no after crop of either pasture or hay. These conditions have forced attention to the production of Annual Forage Crops. By Annual Forage Crops is meant crops which can be seeded and harvested as either pasture or fodder in the same year. The commonest annual forage crops of the West are Oats, Pans and Oats, Fall and Spring Rye. Corn and Sunflowers, with some Millets and Sudan Grass grown in a few districts. The Annual Forage crops have several marked advantages over the Perennials or Biennials. They may be seeded late and used as a cleaning crop both before and after cultivation and by intertillage; they are cheaper to seed and a fair crop is much more sure; they produce as a rule a very much heavier yield, they are harvested during the one year, and there is no danger of winter-killing. The disadvantages of the Annual as compared with the Perennial and Biennial Forage Crops are the labour and expense of seeding each year, the shorter season of growth as pasture crops, and the fact that not nearly so much root fibre is left in the soil. Annual Forage Crops will not take the place of the Perennial Grasses in preventing soil drifting.

Results at the Lacombe, Experimental Station, would indicate that for Ensilage the Best Forage Crops are Sunflowers and Green Oats or in wet years, Oats and Pans. In the last three dry years the Pans have not made sufficient ground to pay for the rather expensive seed, and Pans will not stand pasturing. Corn is rather an uncertain crop in Central and Northern Alberta as the soil must be warm to germinate the seed, and the plants will not at any stage stand frost. For Green Feed or Hay, Oats, or Oats and Pans, or Rye will give the best results. For pasture Fall Rye gives excellent results, but if there is plenty of moisture in the soil, a mixture of Fall Rye and Oats will give a heavier growth and is much more palatable than Rye alone.

F. H. Reed—Superintendent
Experimental Station—Lacombe, Alta.

HERE AND THERE

Here and There

Andrew Ont—Mr. Ritchie, the station agent of the Canadian Pacific Railway, has received instructions from headquarters to rigidly enforce the no trespassing order on the property of this company. This is particularly in reference to people walking down the railway track. When accidents happen it is always a trouble to the company and lately there have been complaints that school children have been using the railway as a thoroughfare.

Vancouver.—"I have been in the Alps and the Pyrenees and never saw anything that can compare with Banff," said William F. Verburgh, Geneva—English man when speaking at Hotel Vancouver. Mr. Verburgh spoke of the wonderful international races staged at the winter carnival, and said that he had on special invitation visited the great motion picture plant at Banff.

Winnipeg.—In connection with movement of grain to Vancouver from September 1, 1922, up to and including February 21st, the Canadian Pacific Railway has delivered to the Orient a total of 476 cars of grain, representing 9,844,346 bushels. During the same period there have been exported from Vancouver to the Orient 1,284,550 bushels and to the United Kingdom 19,882,420 bushels, or a total of 13,167,170 bushels.

During the same period last year, the Canadian Pacific Railway delivered at Vancouver a total of 244 cars of grain, and there was exported from Vancouver during the same period last year 3,300,600 bushels, 1,228,000 of which were exported to the Orient and 2,072,600 to the United Kingdom.

In addition to this grain, which has already been exported from Vancouver so far this season, the C. P. R. is in store in elevator at that port 842,320 bushels according to a statement of R. D. Catterall, Sup. Transport, West. Canada.

MEDICINE HAT.—Within the past year, three locomotive engineers of the Medicine Hat division, James Plaher, Tom Penhale and Henry Hardy, have been retired from active service of the Canadian Pacific Railway on pension. All three were veterans in service, have fired and drilled construction trains in the pioneer days of the C.P.R. for several years. They have been retired from active service for many years of late have been promoted to locomotive crew. Tom Penhale is the oldest in service with the company, having been "retired" in 1881. He has taken an active role part in the community, and was an active member of the C.P.R. for several years. "Jim" Plaher was spent fifty years of his life in the railroad, covering during the entire period over two decades. He was retired as locomotive. He started as fireman on the International and joined the Medicine Hat Pacific in 1881, having pulled a passenger train for the post thirty-six years. Henry Hardy lived with the company in 1887 at Broadview, and later worked on construction engines on the Prince Albert branch in 1890.

Vancouver.—In the C. P. R. Hotel Vancouver, at Vancouver, there are approximately 600 rooms. The all-year-round staff numbers about 400 employees. The comparatively small matter of keeping the paintwork, etc., in spotless condition calls for the continuous service of five painters and ten helpers; and five engineers with four sukers, four sand-men, two oilers and two truckmen are required in the engine-room. There are three basement cleaners, more-over men, four kitchen cleaners, two painters for janitor, a yardman, an ironman, five food cleaners, and three men on the laundry. The duty of the last is to see that every ounce of food leaving the kitchen is fabricated, so that the end of each day the results of the cleaning operations can be checked instantly. The kitchen is the largest unit of the hotel. There is a chef with six assistants, to serve the dining-room and grill. There are three separate cooks for the lunch counter. Two of the cooks attend to the frying, three to the cooking and frying, three

cook vegetables exclusively, and there are six pastry cooks. In addition, there are cooks who bake, others who make coffee. On most nights there is a special menu, and there is another whose sole duty is to clean and mend overalls. To feed the guests in one day 90 dozen eggs are required. Between 1,000 to 1,500 lunch and dinner rolls are baked daily, and to butter them and for cooking, 150 lb. of creamy butter are used each day. "Arrows are cut" at the rate of 200 a day, and between 800 and 1,000 lb. of his working hours making last and there is another whose sole duty is to clean and mend overalls. To feed the guests in one day 90 dozen eggs are required. Between 1,000 to 1,500 lunch and dinner rolls are baked daily, and to butter them and for cooking, 150 lb. of creamy butter are used each day. "Arrows are cut" at the rate of 200 a day, and between 800 and 1,000 lb. of his working hours making last and there is another whose sole duty is to clean and mend overalls. To feed the guests in one day 90 dozen eggs are required.
